

Personal Reflection - Week 4

- *What do I want to learn or understand better?* What I'm currently struggling with is Android Studio and how and where to integrate changes. So, I would like to improve my understanding of that.
- *How can I help someone else, or the entire team, to learn something new?* Most of the team is also struggling with Android Studio, so we all have to learn how to use it. But perhaps I can help other team members as I learn how.
- *What is my contribution towards the team's use of Scrum?* I'm helping with deciding team events and meetings as well as how we should proceed during them and how all the work should be done.
- *What is my contribution towards the team's deliveries?* I'm still primarily working on API requests and integrating that with the app.
