

Personal Reflection - Week 1

- *What do I want to learn or understand better?* I want to figure out what we, as a team, plan to create. In doing so, I also want to learn my role in the team and what I can best do to contribute. That might be programming, brainstorming, or just talking to other members but I want to do my best.
- *How can I help someone else, or the entire team, to learn something new?* I figure everyone else is probably in a similar place in not knowing exactly what to expect and what is expected of them. So, I hope by continuing to meet with my teammates and discuss our plan for the future and the project, I can help others figure that out.
- *What is my contribution towards the team's use of Scrum?* I'm not entirely sure yet what my contribution will be. I will probably do a lot of programming, I hope in any case, as well as determining concretely what we wish to make.
- *What is my contribution towards the team's deliveries?* I have a similar answer to this one. For now, I will help decide what we want to deliver and then I can do my part.
