

Individual Reflection week 5. Alejandra Sanchez Torres.

WHAT DO I WANT TO LEARN OR UNDERSTAND BETTER?

I want to continue learning to program correctly in the new programming language Kotlin, personally after two weeks I feel more comfortable but being something new I am aware that I still have a lot to learn, and I want to keep at it to have achieved this goal at the end of the project.

HOW CAN I HELP SOMEONE ELSE, OR THE ENTIRE TEAM, TO LEARN SOMETHING NEW?

Now it is being a bit complicated to bring knowledge to the team because in Spain the only programming language I have used has been Python. Since I'm using a new programming language, I'm still trying to understand it and get used to it, so I can't provide much knowledge about the development of the application, but I'm always willing to teach them everything I can.

WHAT IS MY CONTRIBUTION TOWARDS THE TEAM'S USE OF SCRUM?

I am part of the scrum team and perform the tasks assigned to me together with my colleague Irene Canovas. As working with someone has always helped me a lot, we usually complement each other quite well and not being aware of the platform we usually ask the rest of the team whenever we have doubts, and they always help us in everything they can.

WHAT IS MY CONTRIBUTION TOWARDS THE TEAM'S DELIVERIES?

My task for this week has been to program the overview page of our application to be able to see the temperature of several Swedish cities and to know the temperature of each city I am interested in. Basically, I have created a search bar for all cities in Sweden, along with components with temperature and city.
