

Personal Reflection - Week 8

- *What do I want to learn or understand better?* I think I've learned much of what I wished to do at the start of this course and as it progressed. Beyond getting more experience in the agile process, I can't think of anything.
- *How can I help someone else, or the entire team, to learn something new?* Similarly, I think now what I can do is help with the final reports and make sure everyone is on the same page about it.
- *What is my contribution towards the team's use of Scrum?* I helped figure out the tasks and how to complete them as a team member.
- *What is my contribution towards the team's deliveries?* I wrote a lot of the background code for communicating with APIs and getting the weather information. I also did some work on the overview page for the UI.
