

Individual Reflection - Anton Svarén

- **What do I want to learn or understand better?**
I want to learn how to set up an android emulator.
- **How can I help someone else, or the entire team, to learn something new?**
I can help out with API calls and be available when someone asks for help.
- **What is my contribution towards the team's use of Scrum?**
We have not assigned any roles yet. But I have tried to implement the things we have learned from the lectures. Such as “planning poker”.
- **What is my contribution towards the team's deliveries?**
I put the business model together, wrote two parts of the model. Me and Elias came up with the UN SDGs for the presentation. Made sure that everything needed for the submission was uploaded to our repository. I tried to come up with ideas and communicated with everyone to get some kind of “brainstorm” going.
