Individual Reflection - Anton Svarén

- What do I want to learn or understand better?
  I want to get more familiar with working in a bigger team than my previous courses as well as get hands-on experience of what it is to be working in a Scrum framework. For example, create new "Epics" or "Stories" and assign them to the best person at hand.
- How can I help someone else, or the entire team, to learn something new?
  I can help out by coming up with new ideas, frameworks, technologies and being available if someone wants to "pick my brain" or be of use when someone needs me to test their methods and code.
- What is my contribution towards the team's use of Scrum?
  I have some(short term) experience in working in Scrum and I hope I can provide some useful technologies that we can use throughout the project. I will also try to structure up the backlog with stories, in such a way that everyone can contribute to the project.
- What is my contribution towards the team's deliveries?
  I mainly want to focus on programming, but I will of course try to create as many "Epics" and "Stories" as I can, so that everyone has something to do. I will try to keep everyone up to date, in order to deliver the deliverables each sprint on time.
