Personal Reflection - Week 5

- *What do I want to learn or understand better?* Now that I've gotten the hang of Kotlin and Android Studio for the most part, I am spending the time continuing to learn how to work in an Agile process. That's what I want to understand better
- *How can I help someone else, or the entire team, to learn something new?* I can help if people are having trouble with Kotlin or the API and any of the code that I developed. I'm doing my best to explain everything I'm doing as I'm doing it.
- *What is my contribution towards the team's use of Scrum?* I'm continuing to provide feedback and suggestions in regards to the development process and how we work together.
- *What is my contribution towards the team's deliveries?* I've created functions and classes that communicate with the weather APIs that we are using. I'm also working on the functions related to converting city names to coordinates for the APIs.
