Personal Reflection - Week 2

- *What do I want to learn or understand better?* How to relate the required work for every part of the project to an Agile mindset. Like, it's easy to have a bunch of tasks, but that doesn't make it Agile.
- *How can I help someone else, or the entire team, to learn something new?* So far, I'm learning Android Studio and Kotlin along with everyone else, so I suppose the most I can do is help others in the same position as me.
- *What is my contribution towards the team's use of Scrum?* I'm helping to figure out the user stories and organization of the tasks in an Agile sense, which is also helping me learn and understand the mindset more.
- *What is my contribution towards the team's deliveries?* I'm primarily working on creating the backend for the app now that I have some understanding of Kotlin.
