Individual Reflection week 3. Alejandra Sanchez Torres.

WHAT DO I WANT TO LEARN OR UNDERSTAND BETTER?

I would like to understand the language better. Since for are being a little more complicated than for the rest because of the language. But my colleagues are being very nice to me, since after each meeting I usually ask everything that is not too clear to me and they try to help me as best as possible.

HOW CAN I HELP SOMEONE ELSE, OR THE ENTIRE TEAM, TO LEARN SOMETHING NEW?

Something interesting that I can bring to help the team is knowledge about Python programming language and Web Scraping technique as I have previous experience in these languages. In Spain we have done several projects around these techniques.

WHAT IS MY CONTRIBUTION TOWARDS THE TEAM'S USE OF SCRUM?

Within this methodology, I am part of the development team and this week I have been learning about Kotlin to begin to familiarize myself with this programming language and to be able to carry out later the app that will be made for this work.

WHAT IS MY CONTRIBUTION TOWARDS THE TEAM'S DELIVERIES?

My contribution to the deliveries is to try to inform myself as much as possible of the tasks assigned to me to be sure that I have understood them perfectly and to try to carry them out as soon as possible in case I must make any modifications.
