# Individual Reflection - Anton Svarén

- **What do I want to learn or understand better?**
  I want to learn how to swap between activities in Android studio/Kotlin, in order to get a better structure between the different pages.
- **How can I help someone else, or the entire team, to learn something new?**
  I can explain my changes in the code and come with concrete examples if they have questions about it.
- **What is my contribution towards the team's use of Scrum?**
  I have created and added new stories to our backlog and discussed when we had conflicts about changing technologies or not. I took the main responsibility to discuss it and tried to get everyone to participate in the conversation, in order for everyone to express their opinion.
- **What is my contribution towards the team's deliveries?**
  I have created a new loading page and changed the starting activity, and how the activities jump between each other. I have also provided new functionality to slide between activities.
